Природа Северной Осетии богата и разнообразна. На небольшой территории республики можно встретить почти рядом самые неожиданные ландшафты: ковыльную степь, влаголюбивые буковые леса, полупустынные межгорные котловины, ущелья, поросшие вечнозелеными соснами, безжизненные скалы и пышные цветущие горные луга, вечные снега и ледники. Это объясняется, прежде всего, сложным горным рельефом республики, а также близостью различных по природе районов, таких, как жаркие закаспийские пустыни, влажные причерноморские субтропики и сухие степи Восточного Предкавказья.

Хотя в нашей республике немало удивительных мест, созданных человеческими руками, мы решили остановиться именно на природных достопримечательностях Осетии, так как в наше время технических открытий человеческие сооружения могут устареть, выйти из моды, а любуясь красотой природы, мы не устаем удивляться ее вечному совершенству. Каждый человек желает хорошо и интересно провести свой досуг. Но, как правило, многие думают, что прекрасный отдых возможен только за границей нашей страны. Но мы считаем, хорошо можно отдохнуть и на территории нашей страны, ведь она очень красива и разнообразна. Вышесказанное определяет актуальность темы.

expensive than group tours, but more interesting.

#### Reviews

Tourist reviews about the waterfalls leave no doubt - if you come to North Ossetia-Alania, you must visit the valley. Incredible mountain landscapes, water that seems to fall directly from the sky - all this must be seen with your own eyes.

#### Transport

You can reach the waterfalls both on your own and by public transport. If you have chosen a bus, then our campaign will easily provide you with transport! This is included in the price.

## "One of the Seven Wonders of the Caucasus".

#### History

The waterfalls are named after the river that forms the canyon, which the locals called "in the depths" due to its unusual location. Almost everyone admires the waterfalls panoramic from the valley, since only trained tourists can climb to the natural attraction. Water cascades are hidden at the top in the Dargava Gorge (altitude more than 2000 meters above sea level). This is almost at the very ice cap at the top. There, like a wall, there is a giant rock, on which eight streams of water from different heights - from 200 to 800 meters, born of melting glaciers, fall.

#### Discover the wonders of the Midagrabin Waterfalls!

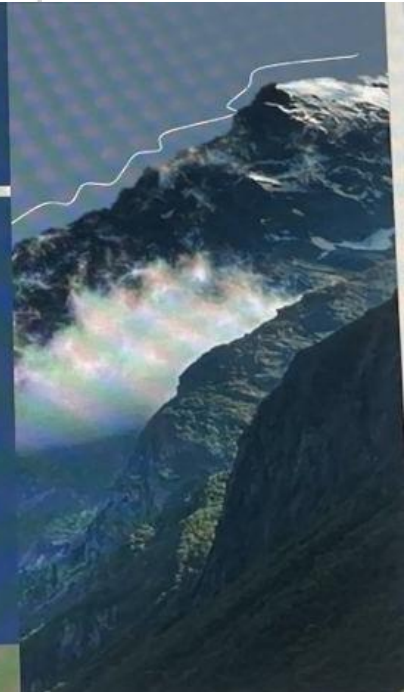

Immerse yourself in a world of incredible nature and breathtaking views! Midagrabin waterfalls are not just a natural phenomenon, they are a real symphony of water, stone and greenery. Midagrabin Gorge is an amazing place in North Ossetia, where there are almost fifty waterfalls that take its origin from the mountain glaciers of the Greater Caucasus Range. Here is the highest waterfall in Europe, alpine meadows and mountain lakes.

## TSEY GORGE

Is located at an altitude of 1300 meters. From east to west the gorge stretches for 23 km, the location attracts with unrealistically beautiful landscapes: mixed forests are diluted with waterfalls and thermal springs, beautiful mountain peaks are shaded by glaciers. On the steep slopes of the gorge you can often see skiers and climbers

## TABLE MOUNTAIN

**Table Mountain**, the calling card of Vladikavkaz, is depicted on the city's coat of arms. On the Rocky Ridge, the height is about 3000 meters. The shape of the mountain resembles a table: steep sheer slopes and a flat top. The mountain is notable for the numerous ancient sanctuaries that remain on the mountain, which are of interest not only to researchers, but also to ordinary tourists. In addition, the mountain is equipped with convenient tourist trails.

**Midagrabin Waterfalls.** They are located in the mountain valley of Midagrabin. In fact, this natural landmark has long been of interest to tourists, but recently, in 1995, it was found out that one of these eight waterfalls - Bolshoi Zaigelan is the highest waterfall in Europe. The height of Bolshoi Zaigelan is 750 meters. If you decide to go to the valley of Midagrabin, do not forget to take your passport with you - this is a border zone and you may be asked for documents for verification.

**"The path of miracles".** It is located in the narrow canyon of Kadargavan - one of the wonders of nature in the territory of North Ossetia. The depth of the canyon is 60 meters, and the width is about 3 meters. Along one of the walls of the gorge, above the cliff, there is a well-equipped path - with railings. You can walk along it, enjoying the local natural beauty.
